

STATEMENT OF RESERVES DATA AND OTHER OIL AND GAS INFORMATION

This statement of reserves data and other oil and gas information has been prepared as at December 31, 2006.

Reserves and Future Net Revenue

The following is a summary of the oil and natural gas reserves and the value of future net revenue of Abenteuer Resources Corp. ("Abenteuer" or the "Corporation") as evaluated by Citadel Engineering Ltd. as at December 31, 2006 (the "Citadel Report"). The pricing used in the forecast and constant price evaluations is set forth in the notes to the tables.

All evaluations of future revenue are after the deduction of future income tax expenses, unless otherwise noted in the tables, royalties, development costs, production costs and well abandonment costs but before consideration of indirect costs such as administrative, overhead and other miscellaneous expenses. The estimated future net revenue contained in the following tables do not necessarily represent the fair market value of the Corporation's reserves. There is not assurance that the forecast price and cost assumptions contained in the Citadel Report will be attained and variances could be material. Other assumptions and qualifications relating to costs and other matters are included in the Citadel Report. The recovery and reserves estimates on the Corporation's properties described herein are estimates only. The actual reserves on the Corporation's properties may be greater or less than those calculated.

Notes:

1. "Gross Reserves" are The Corporation's working interest (operating or non-operating) share before deducting of royalties and without including any royalty interests of The Corporation. "Net Reserves" are The Corporation's working interest (operating or non-operating) share after deduction of royalty obligations, plus The Corporation's royalty interests in reserves.
2. "Proved" reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
3. "Probable" reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
4. "Possible" reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.
5. "Developed" reserves are those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g. when compared to the cost of drilling a well) to put the reserves on production.
6. "Developed Producing" reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
7. "Developed Non-Producing" reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.
8. "Undeveloped" reserves are those reserves expected to be recovered from know accumulations where a significant expenditure (for example, when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.
9. The product prices used in the constant price and cost evaluations in the Citadel Report were as follows: oil: \$54.69/bblCdn FOB Cromer;.
10. The pricing assumptions used in the Citadel Report with respect to net values of future net revenue (forecast) as well as the inflation rates used for operating and capital costs are set forth below. Citadel Engineering Ltd. is an independent qualified reserves evaluator appointed pursuant to NI 51-101.

Discussion

Significant Factors or Uncertainties

The estimation of reserves requires significant judgment and decisions based on available geological, geophysical, engineering and economic data. These estimates can change substantially as additional information from ongoing development activities and production performance becomes available and as economic and political conditions impact oil and gas prices and costs change.

Oil and Gas Properties and Wells

The following table sets forth the number of wells in which the Corporation held a working interest as at December 31, 2006:

Area	Oil		Natural Gas	
	Gross ⁽¹⁾	Net ⁽¹⁾	Gross ⁽¹⁾	Net ⁽¹⁾
Producing	5	2.153	-	-
Non-producing	-	-	-	-

All of the Corporation's wells are located in Kingsford, Sk..

Costs Incurred

The following table summarizes the capital expenditures made by the Corporation on oil and natural gas properties for the year ended December 31, 2006.

Property Acquisition Costs (M\$)		Exploration Costs (M\$)	Development Costs (M\$)
Proved Properties	Unproved Properties

Discussion

Properties with No Attributed Reserves

The Corporation currently holds no properties with no attributed reserves.

Forward Contracts

Currently, the Corporation has no forward contracts.

Abandonment and Reclamation Costs

Future abandonment costs have been estimated at \$50,000 per well; average costs for the area.

Tax Horizon

The Corporation does not expect to be taxable in the immediately foreseeable future.

Production Estimates

The following table sets forth the volume of production estimated for 2007 (net Company reserves):

Area	Light and Medium Oil (mbl)	Natural Gas (mmcf)
	18.1	-

Production History

There has been no material change in the netback since the prior reporting period.
